👤 PROFILE

- **Full-stack AI Engineer** with **4+ years of professional experience** in **software development**, currently pursuing a Master's degree in **Data Science** with a focus on **Generative AI**
- Skilled in **API and LLM integration**, **workflow automation**, **RAG & agentic systems**, **deployment** and **monitoring** of AI applications
- Strong communication skills with structured and independent way of working

📁 PROFESSIONAL EXPERIENCE

HiWi SOFTWARE DEVELOPER, *Otto von Guericke University*

June 2025 – Current | Magdeburg, Germany

- Developed and enhanced full-stack features for the OVGU university application using **Spring/Kotlin, Vue, Flutter**, and **PostgreSQL**, improving user engagement by **20%**
- Designed and implemented **automated test suites** for **unit, integration, and E2E testing** using **JUnit, Vitest, Flutter, and Playwright**, improving software quality and release stability.
- Performed a **Linux-based** server migration and maintained **containerized** services across multiple environments
- Managed **Android** and **IOS** releases, including packaging, app store submission, and updates
- Handled end-to-end **deployment, monitoring**, and incident response to ensure high availability and reliable operation

SOFTWARE ENGINEER, *Nomura Research Institute Financial Technologies India Pvt. Ltd.*

Aug 2020 – Feb 2024 | Kolkata, India

- Developed **critical features** for a **multi-tenant trade back-office system**, processing over A\$4.7 billion in trades per day on the Australian Stock Exchange
- Developed real-time trading dashboards and **25+ end-to-end modules** using **Java, Spring Boot, SQL** and **JavaScript**
- Actively participated in **Agile-based** sprint planning and **code reviews**, prepared **impact analysis reports** and maintained **technical documentation** to support development and release activities
- Automated **AWS-based deployment** workflows with **Jenkins**, cutting manual effort by **50%**
- Fixed high priority bugs and enhanced overall system reliability

📁 PERSONAL PROJECTS

AI-Powered SQL & Visual Analytics Platform – [\(Link\)](#)

- Built an AI-powered analytics platform that converts natural-language input into optimized SQL, KPI insights, and data visualizations for connected **Supabase** environments using **MCP-based** schema and query access.
- Orchestrated a multi-agent backend for metadata-aware SQL generation, chart creation, and KPI recommendations, with **Redis** caching and **SQS-based asynchronous processing** for scalable workloads.
- Deployed a serverless **AWS** architecture using **Lambda, API Gateway, S3**, and **CloudFront**, with infrastructure and releases automated through **Terraform** and **GitHub Actions CI/CD**.

Multimodal RAG Chatbot – [\(Link\)](#)

- Built a multimodal **RAG** application (**FastAPI+React**) for querying websites, documents, audio, and embedded images, with ingestion powered by **Crawl4AI** and **Docling**.
- Developed a **PydanticAI** RAG agent with adaptive tool routing and hybrid retrieval, backed by **PostgreSQL** for embeddings, metadata, and semantic search.
- Achieved >90% on critical **DeepEval** metrics, added observability with **Langfuse** and **CloudWatch**, and deployed the **Dockerized** application to **AWS App Runner** via **Amazon ECR**.

Job search Automation pipeline using n8n - [\(Link\)](#)

- Built a job-search automation workflow using **n8n**, integrating LinkedIn data ingestion, AI-based relevance scoring, and automated resume tailoring
- Utilized **Apify** and **Google API** to scrape and log structured job data to a personal **Google Sheets** repository
- Created a chatbot as a **n8n web-hook** trigger, that captures a LinkedIn job URL and triggers the automation pipeline

ACADEMIC PROJECTS

Decentralized Multi-Agent Swarm Reasoning for Constrained Planning Tasks - [\(Link\)](#)

- Designed and implemented a decentralized multi-agent reasoning framework using **LangGraph**, combining Tree-of-Thought search and Ant Colony Optimization for constrained planning tasks
- Built a task-aware scoring pipeline to validate scheduling constraints, rank candidate reasoning traces, and support iterative pheromone-guided search across agents
- Evaluated the system on the NaturalPlanner benchmark, improving solve rate from 24.75% for a single-agent baseline to 40.00% with the full multi-agent framework, demonstrating effectiveness of decentralized agentic planning

Fine-Tuned Open AI's Whisper ASR Model on Low Resource Language - [\(Link\)](#)

- Fine-tuned OpenAI Whisper model for low-resource Indian languages, achieving improved transcription quality and 100% WER reduction compared to baseline
- Performed comparative analysis of 3 major **PEFT** techniques, with **QLoRA** consistently delivering the best performance
- Developed a configurable CLI-based fine-tuning pipeline that automates the full ML workflow, from data preparation and training to evaluation and model publishing

EDUCATION

Master of Science In Data and Knowledge Engineering,

Otto-von-Guericke-University Magdeburg, Current GPA: 1.4 (German scale)

Apr 2024 – present

Magdeburg, Germany

Bachelor of Technology in Information Technology,

TechnoIndia Saltlake, CGPA: 8.35/10

Aug 2016 – Jul 2020

Kolkata, India

SKILLS SUMMARY

• Programming Languages:	Python, R, SQL, Java, Kotlin, JavaScript, TypeScript, Dart
• Deep Learning Frameworks:	PyTorch, TensorFlow
• LLM Orchestration:	LangChain, LangGraph, Crew AI, Autogen, PydanticAI, Agents SDK
• LLM Tools & Integration:	MCP, A2A, OpenAI API, Hugging Face
• AI Coding & Developer Tools:	Codex CLI, Claude Code
• Automation Tools:	n8n
• Backend, Web & App Development:	Fast API, Spring Boot, React, Vue, Flutter, Streamlit, Gradio
• Software Testing:	JUnit, Vitest, Playwright
• Databases & Vector Stores:	Oracle DB, MySQL, PostgreSQL, pgvector, Chroma, Qdrant
• Data Analysis:	NumPy, Pandas, Matplotlib, Plotly, ggplot2
• Observability:	Langfuse, LangSmith, AWS CloudWatch
• Caching & Queuing Services :	Redis, Amazon SQS, ActiveMQ
• Cloud, DevOps & CI/CD:	Git, Modal, Vercel, Docker, AWS, GCP, Terraform, Github Actions, Jenkins

LANGUAGES

English (C1) | German (A2) | Bengali (Native)

CERTIFICATES

- LLM Engineering certification from Udemy
- Agentic AI certification from Udemy
- LLMops : Building Production-Ready LLM Systems from Educative
